

Star Trac V-Bike

Preventative Maintenance

Star Trac and Blue Fitness strongly recommend performing regular preventive maintenance on your **STAR TRAC V-Bikes**.

Without regularly scheduled maintenance, normal wear and tear may cause cumulative effects, such as misalignment or premature wear. This may result in downtime.

Any unusual symptoms, should be reported to Blue Fitness on (09) 845 0035 or via the website www.bluefitness.co.nz and Product Support.

DAILY MAINTENANCE

- Dry the V-Bike after each use to remove seat and moisture using a non-abrasive liquid cleaner and water solution.
- Rinse all surface to remove any detergent residue and then dry.

NOTE: *DO NOT wipe the chain with soap or towel and avoid the brake pad when cleaning.*

NOTE: *Do not use a petroleum based solvent for cleaning your V-bike*

PERIODIC INSPECTION

The crank arms should be re-torqued after the first 10 hours of use and every 100 hours of operation, thereafter.

Inspect all parts, nuts and screws for any adjustments, replacement maintenance needs.

CHAIN LUBRICATION: It will be necessary to lubricate the chain once a month or after 100 hours of use, whichever comes first. The chain should be lubricated with light chain oil, using a bristle brush.

CHAIN ADJUSTMENT: It should not require adjustment initially however over time, with use it may require it. For instructions please see the owners manual or call Blue Fitness (see below)

BREAK PAD REPLACEMENT: The brake pad will become flat over time and thus you will lose the tension on the fly wheel. For a new brake pad please contact Blue Fitness. We recommend these should be changed at least once/year.
